

Cost-Effective Agility

Developed by Unitree Robotics, a company initially famous for its quadruped robotic dogs, the H1 represents a massive leap into the bipedal humanoid market. The H1 is characterized by its high speed, robust power, and highly competitive price point compared to Western counterparts, aiming to democratize humanoid robotics research and application.

Performance and Speed

The Unitree H1 is currently recognized as one of the fastest full-size humanoid robots in the world. It holds speed records for humanoid running, utilizing highly advanced, self-developed high-torque joint motors and a deeply optimized dynamic control algorithm.

Technical Specifications

Height	~180 cm (5 ft 11 in)
Weight	~47 kg (103 lbs)
Max Speed	> 3.3 m/s (World Record for full-size humanoid)
Vision System	3D LiDAR + Depth Camera for 360-degree perception

"Accelerating the commercialization of humanoid robots through affordable, high-performance hardware."
